Data center

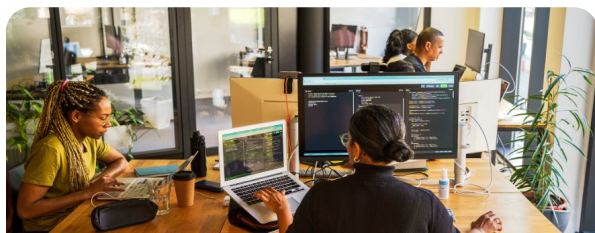

View the data center locations where SAP cloud services are offered.

Customer Access to Availability

If you are an SAP customer, please access the SAP for Me customer portal. It is the central access point and go-to destination for SAP customers to view details on their SAP cloud tenants' availability, including maintenance schedule and more.

Middle East & Africa

This overview is meant for informational purposes only. It displays data centers where SAP cloud services are currently being operated.

Please note that SAP's cloud solution portfolio is being gradually integrated into the data center map. SAP cloud services may also be deployed in data centers other than those shown. For some SAP cloud services, the customer can select the data center during implementation. SAP operates secondary data centers (not listed here) in the same region as the primary data center for backup and disaster recovery purposes.

SAP reserves the right to change this overview at its sole discretion. For further information, please contact your SAP sales representative.

Service capabilities

SAP data centers provide a comprehensive range of capabilities to support a wide range of business applications and workloads.

Cloud hosting and management

SAP data centers host cloud solutions such as SAP S/4HANA and SAP Business Technology Platform, and provide robust infrastructure management services to help ensure optimal performance and uptime.

Data residency and compliance

Globally dispersed data centers allow businesses to store and process data within specific geographic locations, meeting local regulatory requirements.

Scalability and flexibility

Businesses can adapt data center resources—extra storage, more computing power, or tailored configurations—to meet increasing demands.

Disaster recovery and backup

Advanced disaster recovery solutions help ensure data protection and recoverability in the event of an unforeseen incident.

Data Center FAQs

▼ Which regions are SAP cloud services available in?

SAP cloud services are strategically offered in key regions worldwide, including the Americas, Europe, and Asia Pacific, to help ensure compliance with local regulations and low latency.
